INDIA INC TO GAIN FROM CAPEX PUSH

CEOs expect big govt orders as pvt capex picks up

DEV CHATTERJEE
Mumbai, 1 February

With the Indian government increasing its infrastructure budget to ₹10 trillion, apart from making additional expenditure on green transition, top Indian companies led by Larsen & Toubro, Siemens, Thermax, HCL, and the Tatas can expect a surge in their order book. Government-led capex in infrastructure will lead to private sector companies increasing capacity to meet demand, CEOs said.

CEOs said as their capacity utilisation was slowly inching up above the 75 per cent level, they will have to increase their capacity to meet the growing demand from the railways, roads, and infrastructure sectors.

"We expect demand to pick up as the government rolls out mega infrastructure projects. This (infra push) will lead to a surge in demand for steel, cement, railway wagons, auto products like trucks and tractors," said the CEO of a large firm.

Rlys to Get ₹2.4L Cr for Future Upgrades

Team ET

The government proposes to spend ₹2.4 lakh crore on upgrading railway infrastructure in FY24, a move in line with its focus on making the national transporter "future ready".

A large chunk of this amount will be spent on laying new railway lines, doubling existing ones and purchasing rolling stock, finance minister Nirmala Sitharaman said in her budget speech on Wednesday.

The capital expenditure support for

the railways in the next fiscal year is 50% higher than the ₹1.59 lakh crore allocated in the revised estimates for 2022-23, maintaining the trend of higher allocation for Indian Railways. The latest outlay was about nine times the amount earmarked in 2013-14, Sitharaman said.

The allocation for purchasing rolling stock has been more than doubled to ₹37,581 crore from the revised estimates of 2022-23. This, experts said, will help in getting more indigenously developed Vande Bharat trains into the system and in procurement of freight wagons.

Vivek Lohia, managing director at Jupiter Wagons, a supplier of wagons to Indian Railways, said the capital outlay will strengthen the railways' infrastructure.

Despite the push for modernisation, the high wage bill of the railways continues. For FY24, the total revenue expenditure is pegged at ₹1.55 lakh crore, of which ₹70,616 crore will be appropriated to the pension fund. This is higher than the ₹56,100 crore appropriated for pensions out of the total revenue expenditure of ₹1.38 lakh crore in 2022-23.

Bengal's industrial circles finds Union Budget encouraging overall

Kolkata, Feb 1 The industry fraternity in West Bengal has found the Union Budget 2023-24 quite progressive and overall encouraging for all the sections of the society.

According to the Merchants' Chamber of Commerce & Industry President Namit Bajoria, besides giving a lot of stress on the agriculture sector and rural economy, the budget proposals have given emphasis on the MSME and infrastructure sector which will have a multiplier effect on the economy, including job creation.

"Startups have been brought under agri-acceleration scheme and Rs 2,200 crore outlay has been made for this scheme, which is an extremely welcome move. It is heartening to see that the agricultural credit target has been kept at Rs 2.4 lakh crore and Rs 6,000 crore has been allocated for fishermen's development," he said.

Open in App

Welcoming the reduction in customs duty on imports of various inputs of industrial use and further lowering the income tax slabs, Bajoria expressed apprehension over the real difference between the new and old income tax regime.

Federation of Indian Export Organisations's (FIEO) Eastern Regional Chairman Yogesh Gupta said that while the increased capital investment outlay by 33.4 per cent will be a major boost for the economy and will also increase employment, the decision to revamp the credit guarantee scheme by infusing Rs 9,000 crore and reduction of one per cent interest for MSME is a welcome move.
