- Order Book of Rs. **5,95,265** lakh as on Sept 30, 2023

Commenting on the results, Mr. Vivek Lohia, Managing Director of Jupiter Wagons Ltd. said, “We are pleased to continue the strong momentum in operational and financial performance. Revenue from operations was Rs. 87,930 Lakh, higher by 111% on a year-on-year basis. We reported EBITDA of Rs. 12,117 lakhs, higher by Rs. 143% on a YoY basis. We have further elevated our margin profile this quarter and continue to report Industry-leading EBITDA margin of Rs. 13.8% in Q2FY24 compared to 12.0% reported in Q2 last year. Profit after tax was Rs 8,158 lakhs, higher by 229% YoY.

We have made meaningful progress this quarter on implementing our growth plans which will enable us to further scale up operations. We are adding capacity to the foundry at the Kolkata Unit while setting up a new foundry at our Jabalpur Unit. There are also efforts underway to drive greater backward integration and efficiencies across operations which will further enhance profitability in the wagons business, amidst a buoyant demand outlook. In addition to attractive growth opportunities across verticals in the parent entity, our various Joint Ventures are extremely well positioned to capitalize on the exciting opportunities across the landscape.

There are exciting developments lined up for the rest of the year as we anticipate continued ordering momentum in wagons, braking systems and brake discs as well as the scheduled launch of our E-LCVs in the fourth quarter of the financial year. Even as we aggressively pursue growth by committing incremental capital for expansion, the improving return ratios reflect our disciplined capital allocation strategies.”

Key Developments

- The production momentum of wagons for public and private customers continues to remain robust.
- The capacity of existing foundry at Kolkata Unit will be increased from 2,500 metric tonnes at present to 3,000 metric tonnes by the conclusion of this fiscal year.
- A new foundry is scheduled to be established in Jabalpur over the course of next 18 months with a capacity of 2,000 tonnes, catering to both captive use and exports. This initiative is expected to yield cost savings in freight expenses.
- Indian Railway tender for 20,000 wagons has been issued and the timeline for submission is mid of November.
- The wagon manufacturing capacity has been increased to ~700 wagons per month at present. Once the expanded capacity of foundry is made available, it is expected that production capacity will increase to 800 wagons per month.
- With handover and integration activities nearing completion, it is anticipated that Stone India will initiate its operational activities in Q4FY24.
- Electric Mobility: the vehicle is scheduled for testing in November, and we are progressing as planned for its commercial launch in the fourth quarter of this fiscal year.
